

Tecnorama

Hall E1 Stand D02

Italy's Tecnorama is to show the WP/144 automatic laboratory dispensing system. This new machine dispenses dyes and chemical solutions, with a volumetric multi-pipette system, and chemical products in powder and granulate form.

Also on show will be the Dyrama 8/100, a laboratory dyeing machine with 8 independent dyeing units, for 50 up to 100g each, with automatic loading/unloading of the samples. In addition, Tecnorama is demonstrating the Spectrodye-T, an optical system that measures colour during the dyeing process.
