

## Tecnorama - Leading Company in Automatic Dosing and Dyeing Machines

Renewed success for Tecnorama at Barcelona ITMA 2011: more than 1.000 visitors appreciated the showed developments and innovations, some sales contracts have been finalized

directly during the fair.

Besides to the upgrade of *Dos&Dye Compact*, the automatic system for laboratory dyeing, Tecnorama presented its new *Dosorama HS* that allows to carry out more complete recipes with a better accuracy and with a speed which is 10 times faster than the best machines so far available on the market. Another innovation is *Spectrorama*, the undoubtedly forefront that excited interest and satisfaction: it's the unique device that allows a detailed color analysis during the dyeing cycle.

Patented all over the world, the machines conceived and proposed by Tecnorama confirm the engagement and the passion of the technicians of Research and Development Centre to answer to all market needs offering efficient solutions able to obtain the exact planned result by optimizing resources and costs.
