

# Tecnorama to present new solutions for dye-house automation

*The systems have been designed to comply with Industry 4.0 standards and offer high levels of accuracy*

As a commitment of its presence in India, Tecnorama will be at India ITME 2022 to showcase its latest innovations in dyeing laboratory automation. The globally recognised Dos&Dye® system is the first and the only one to develop the right recipe for bulk dyeing machines in order to avoid correction and re-dyeing in production with considerable time and resource savings. Composed of a Dosorama dispensing machine and a robotised dyeing module, Dos&Dye® works independently for 24 hours a day and seven days a week. It automatically performs the entire dye bath process without any operator intervention and matches the features complying with Industry 4.0.

Fully integrated in Dos&Dye®, the new Dosorama Smart and the Dosorama Clever laboratory dispensing machines present the innovative Mono Plunger system, maintaining

Lorenzo Marsiglio, Sales Director, Tecnorama

all the features of Dosorama dispensing machines, such as speed of execution, dispensing accuracy and elimination of contamination typical of the obsolete mono-pipette systems. They have been specifically designed to considerably reduce the need for technical intervention and to guarantee easy maintenance. The company will showcase its products at the booth of its agent, Kailash Textech Solution, at H5 G12.
